20.1. UNFPA’s determination of a bid’s responsiveness is to be based on the contents of the bid itself.

20.2. A substantially responsive bid is one that conforms to all the terms, conditions, and specifications of the bidding documents without material deviation, reservation, or omission. A material deviation, reservation, or omission is one that:
   a. affects in any substantial way the scope, quality, or performance of the goods and related services specified in the contract; or

Such omission shall not be related to any aspect of the price of the bid. Failure of the Bidder to comply with the request may result in the rejection of its bid.
   c. UNFPA shall correct arithmetical errors on the following basis:
      - If there is a discrepancy between the unit price and the line item total that is obtained by multiplying the unit price by the quantity, the unit price shall prevail and the line item total shall be corrected, unless in the opinion of UNFPA there is an obvious misplacement of the decimal point in the unit price. In that case the line item total as quoted shall govern and the unit price shall be corrected;
      - if there is a discrepancy between words and figures, the amount in words shall prevail;
      - if there is an error in a total corresponding to the addition or subtraction of subtotals, the subtotals shall prevail and the total shall be corrected; and

UNFPA shall examine the bid to confirm that it does not contain any material deviations, reservation, or omission related to the conditions and requirements specified in the Section II Technical Specifications and Schedule of Requirements, Section III UNFPA General Conditions of Contract and Section IV UNFPA Special Conditions for Contracts.

23.2. If after the examination of the terms and conditions and the technical evaluation UNFPA determines that the bid is not substantially responsive in accordance with Instructions to Bidders Clause 21, the bid shall be rejected.

25.1. UNFPA shall evaluate each bid that has been determined, up to this stage of the evaluation, to be substantially responsive.

Bid comparison will be made on the total cost or the cost per cardboard box basis (in the case of the bidders come with proposals that accommodate more/less than the expected number of cardboard boxes (58,480) delivered to final destination. UNFPA reserves the right to compare freight prices of Bidders with rates of reputable freight forwarders and to consider such rates for the purpose of bid evaluation. In the event that Bidder’s freight prices are found to be less competitive than the rates offered by freight forwarders, UNFPA may issue a contract on FCA (Point of departure) basis to the Vendor instead of DDP, and issue a separate contract for freight to a freight forwarder if deemed in the best financial interest of UNFPA.

27. **Post-qualification of the Bidder**

27.1. UNFPA shall determine to its satisfaction whether the Bidder with the lowest priced, substantially responsive bid is qualified to perform the contract satisfactorily.

27.2. The determination shall be based upon an examination of the documentary evidence of the Bidder’s qualifications submitted in the bid.

  b. The Bidder shall disclose instances of previous past performance that may have resulted in adverse actions taken against the Bidder and the manufacturers whose products are being offered by the Bidder, in the last five years. Such adverse actions may be treated as unsatisfactory performance history while deciding the award of contract. If no instance of previous past performance has resulted into adverse actions, this must be clearly indicated in the Bidder’s bid.

For non manufacturer Bidders:

a. Legally enforceable authorization from the manufacturer assuring full guarantee and warranty obligations as per the tender conditions for the goods offered; and

b. The Bidder, as authorized by the manufacturers, has supplied and provided after sales service for similar goods to the extent of at least 20 percent of the quantities indicated in the tender requirements in any one of the last three years, and the goods must be in satisfactory operation.
27.4. Notwithstanding anything stated above, UNFPA reserves the right to assess the Bidder’s capabilities and capacity to execute the contract satisfactorily before deciding on award.

27.5. Even though the Bidders may meet the above qualifying criteria, they can be subject to disqualification if they have made misleading or false representations in the forms, statements and attachments submitted in proof of the qualification requirements, and/or record of poor performance such as, not properly completing contracts, inordinate delays in completion, litigation history, financial failures, etc.

27.6. If required by the evaluation team, prior to contract award, the successful Bidder(s) may be requested to send a sample or prototype of the requested products to the end-user in Maputo, Mozambique. 28. **UNFPA’s Right to Accept Any Bid and to Reject Any or All Bids**

28.1. A bid that is rejected by UNFPA may not be made responsive by the Bidder by correction of the non-conformity. A responsive bid is defined as one which conforms to all the terms and conditions of the UNFPA’s bid solicitation documents without material deviations. UNFPA shall determine the responsiveness of each bid against the UNFPA solicitation documents.

28.2. UNFPA reserves the right to reject any bid if a Bidder has previously failed to perform properly or complete on time in accordance with contracts or the Bidder who in UNFPA’s perspective is not in a position to perform the contract.

**Purpose and Background:**

The shelves are needed for the storage of 58,480 cardboard boxes. **Size of each box**: H 200 mm, W 230 mm, L 310 mm. Each filled box has an average weight of 8 Kgs or 17.637 Pounds. The boxes are used to store questionnaire (paper material) sheets of the National Population Census.

Shelves units have to be installed by the supplier and include a quality warranty of one year (12 months).

Given the nature of existing warehouse facilities, the shelves cannot be affixed to the roof nor to the wall, but are to be connected to each other at the top using locking bars.

**Technical Specifications of Shelf Units:**

- Each shelves unit structure with a max height 2.60m
- The width and the length of each shelf may vary, but taking in consideration the following:
  - The boxes, in form of a rectangular prism are labelled at the narrower lateral face. Therefore, the boxes have to be stored with the narrower and labelled side to the front/corridor to allow reading. Two (2) parallel rows of boxes are formed on each shelf, i.e. one box behind the other. See sample of design of shelves unit under Section II, 2.1.1.
  - Due to the material of the cardboard and weight of the content, the boxes can only be stacked in two layers, i.e. one box on top of the other on each shelf sheet. See sample of design of shelves unit under Section II, 2.1.1.
- Shelves sheets: made of metal or equivalent or stronger material shelf sheets with omega-reinforcement (for greater resistance to the structure) or equivalent.
- Enough handling space between the top boxes and the contiguous upper shelf sheet.
- Adjustable shelf sheets.
- Beams / supporting frames: made of metal or equivalent or stronger material.
- Demountable structure.
- Each shelves unit structure (both shelf sheets and beams / supporting frames structure) to be strengthened with additional reinforcements to provide stability and the weight support to safely sustain the expected
maximum load. Examples: X-shaped bars on the sides of the shelves unit, triangle locking brackets, etc.

- Painting of shelf sheets and beams / supporting frames: Epoxy powder coating or similar or higher quality material (material produced with stainless steel), as applicable
- Rubber protectors on the based are an option to be considered / or equivalent protection which protects the floor and the shelves and guarantees a safe position of the shelves.
- Manufacturing process: Industrial, preferably
- The material must have certified quality (e.g. TUV, ISO, etc.)

It is requested that the proposals to be submitted should be accompanied by all information concerning the proposed product: Height, width, depth, and specifications of the material to be used for shelves and profiles, type of proposed reinforcement, connection elements, paint to be used including illustrative scheme of the quoted shelves.

**Warehouse dimensions (locations where shelves units will be installed): see in following page:**

- The shelves units will be installed in two warehouse: warehouse I with an available space of 1,000 m², and warehouse II with an available space of 700 m²
- The floor plan under Section II 2.1.2. shall give an impression of the dimension of the two warehouses (2.1.2a is warehouse I and 2.1.2b is a part of warehouse II). The yellow part of warehouse I shows shelves which are already installed and therefore is not part of this ITB. The composition of the shelves in the floor plan is variable, however it shall provide enough maneuvering space between shelves units, preferable as shown in the floor plan under Section II 2.1.2
2.1.1. Sample of design of shelves unit
2.1.2a. Sample of Layout floor plan on how shelves can be installed in Warehouse  I

2.1.2b. Layout floor plan on how shelves will be installed in Warehouse  II
